

## IDEAS THAT WORK

Our mission is to find the perfect creative solution for our customers' challenging problems.

## WHAT WE BELIEVE

### CREATIVITY

It is our continuous search for new solutions that makes our work truly gratifying.

### SUSTAINABILITY

We work on developing environmentally friendly, energy efficient, reduced heat and noise emissions machines, ensuring long term reliability for our partners.

### QUALITY

We do not compromise on quality or safety standards during the manufacturing and refurbishment process. All our machines fully comply with current operating and machine safety standards, since 2005 we have been certificated according to ISO 9001.

Dr. Richárd Jankovits

István Jankovits

## 25 YEARS' EXPERIENCE

Started in 1992 as a family business, we filled a gap in the market of repairing spare parts for hydraulic machines and production equipments. Later, as our partners' requirements became more complex, we were involved in solving process problems, together with manufacturing subassemblies, as well as complex and simpler parts.

As a company our development has been continuous, with each project adding valuable experience placing us in the forefront of the design and production of custom built machinery, single-purpose machines and automated production lines in Hungary today.

**ISTVÁN JANKOVITS**  
starts a family business for manufacturing and repairing hydraulic cylinders and devices

**1997**

**HYDRAULIC TRAINING LAB**  
opens at the Széchenyi István University, joining the university's Practising Program

**2001**

**REGIONAL WINNER OF THE AWARD FOR BEST INNOVATION**  
for the development of the 200 ton, multipurpose hydraulic deep drawing machine

**2004**

**ISO 9001**  
certification achieved

**2006**

**INTRODUCTION OF SPECIALISED HOSE PRODUCTION**  
for the vehicle and aircraft industries

**2009**

**DEVELOPMENT OF A SPECIAL CYLINDERS AND POWER SUPPLY FAMILY**  
using environmentally friendly technologies in the interests of increased lifetime and energy efficiency

**2011**

**KISALFÖLD PRESTIGE AWARD**  
Chamber Special Award

**2011**

**PRODUCTION MANAGEMENT, TOGETHER WITH REORGANISATION**  
and workforce expansion

**2017**

**1992**

**A NEW INDUSTRIAL HALL**  
opens increasing our business space by 500 m2 for manufacturing and development, and 320 m2 of office space

**1997**

**ISTVÁN JANKOVITS IS NAMED ENTREPRENEUR OF THE YEAR**  
by the National Association of Entrepreneurs

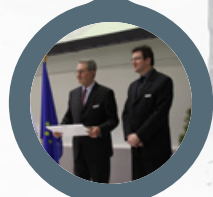

**2004**

**KISALFÖLD PRESTIGE AWARD**  
in the innovation category

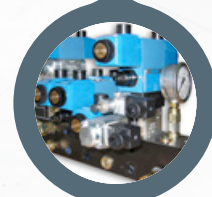

**2005**

**EXPANSION OF INDUSTRIAL HALL**  
to keep up with the increasing production and sales of spare parts

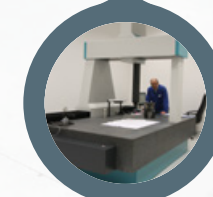

**2008**

**INTRODUCTION OF UNIQUE BLOCK MANUFACTURING**  
following the acquisition of three and five-axis CNC machining centres

**2010**

**SITE DEVELOPMENT**  
a new 755m2 production and assembly hall and a 3D air conditioned measuring room

**2011**

**ISTVAN JANKOVITS REPEATEDLY WINS THE PRIZE OF THE YEAR AWARDED**  
by the National Association of Entrepreneurs

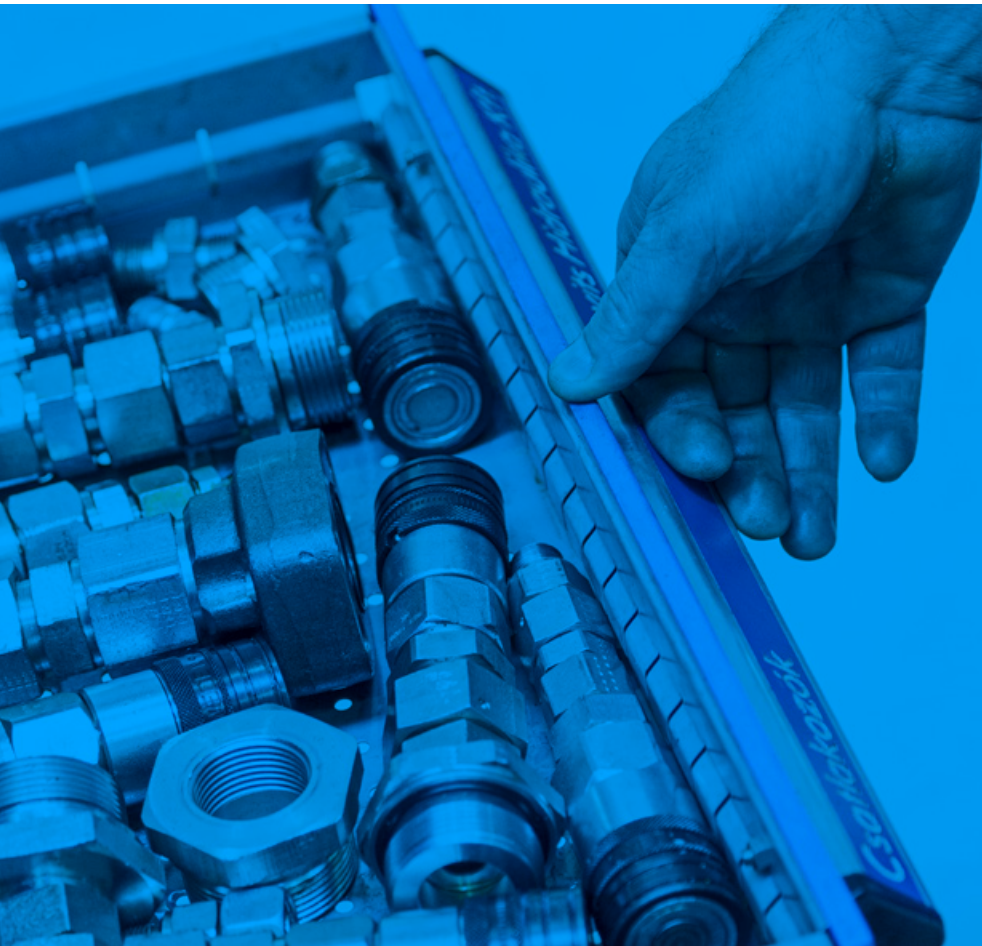

**2015**

**25 YEARS OF CONTINUOUS EXPANSION**  
The start of a new 750m2 production facility with office buildings and a further employee increase

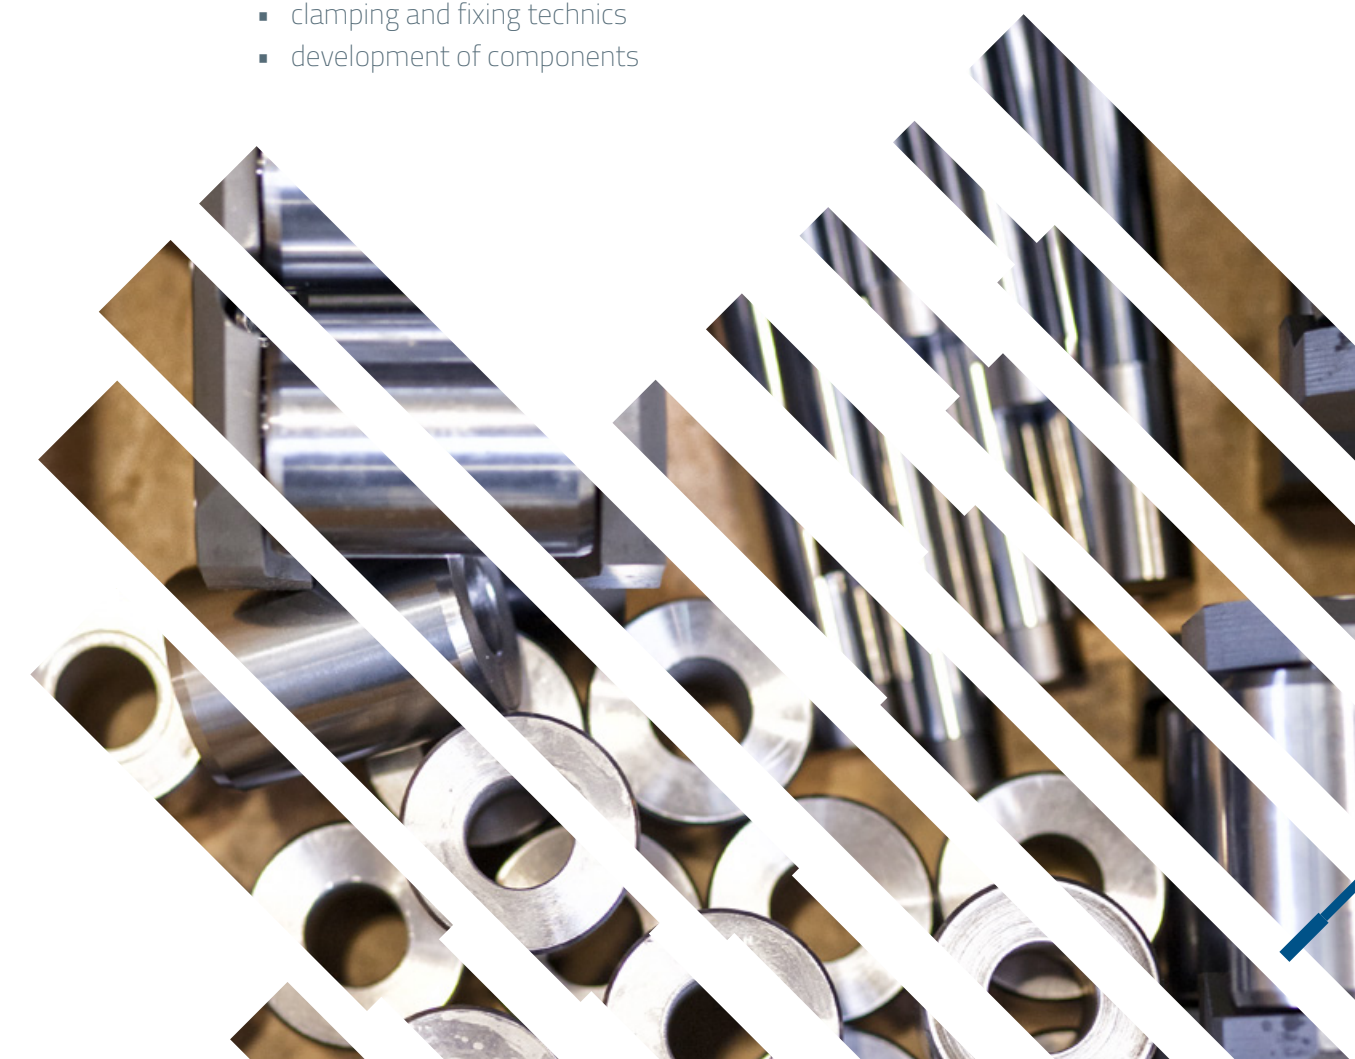

## MACHINERY

Our company's main activity is the planning, production, installation, maintenance and repair of special purpose machinery and production lines. We offer our clients a comprehensive service from conception to implementation. Over the past few decades we have successfully completed nearly 500 individual projects in almost every sector of the industry. Besides the planning and manufacturing of custom-made machines, we undertake the transformation, modernization and renovation of existing machines.

## Our main machine types:

- processing machines
- testmachines
- pressmachines
- machines for final inspection
- mounting equipments
- clamping and fixing technics
- development of components

## AUTOMATION

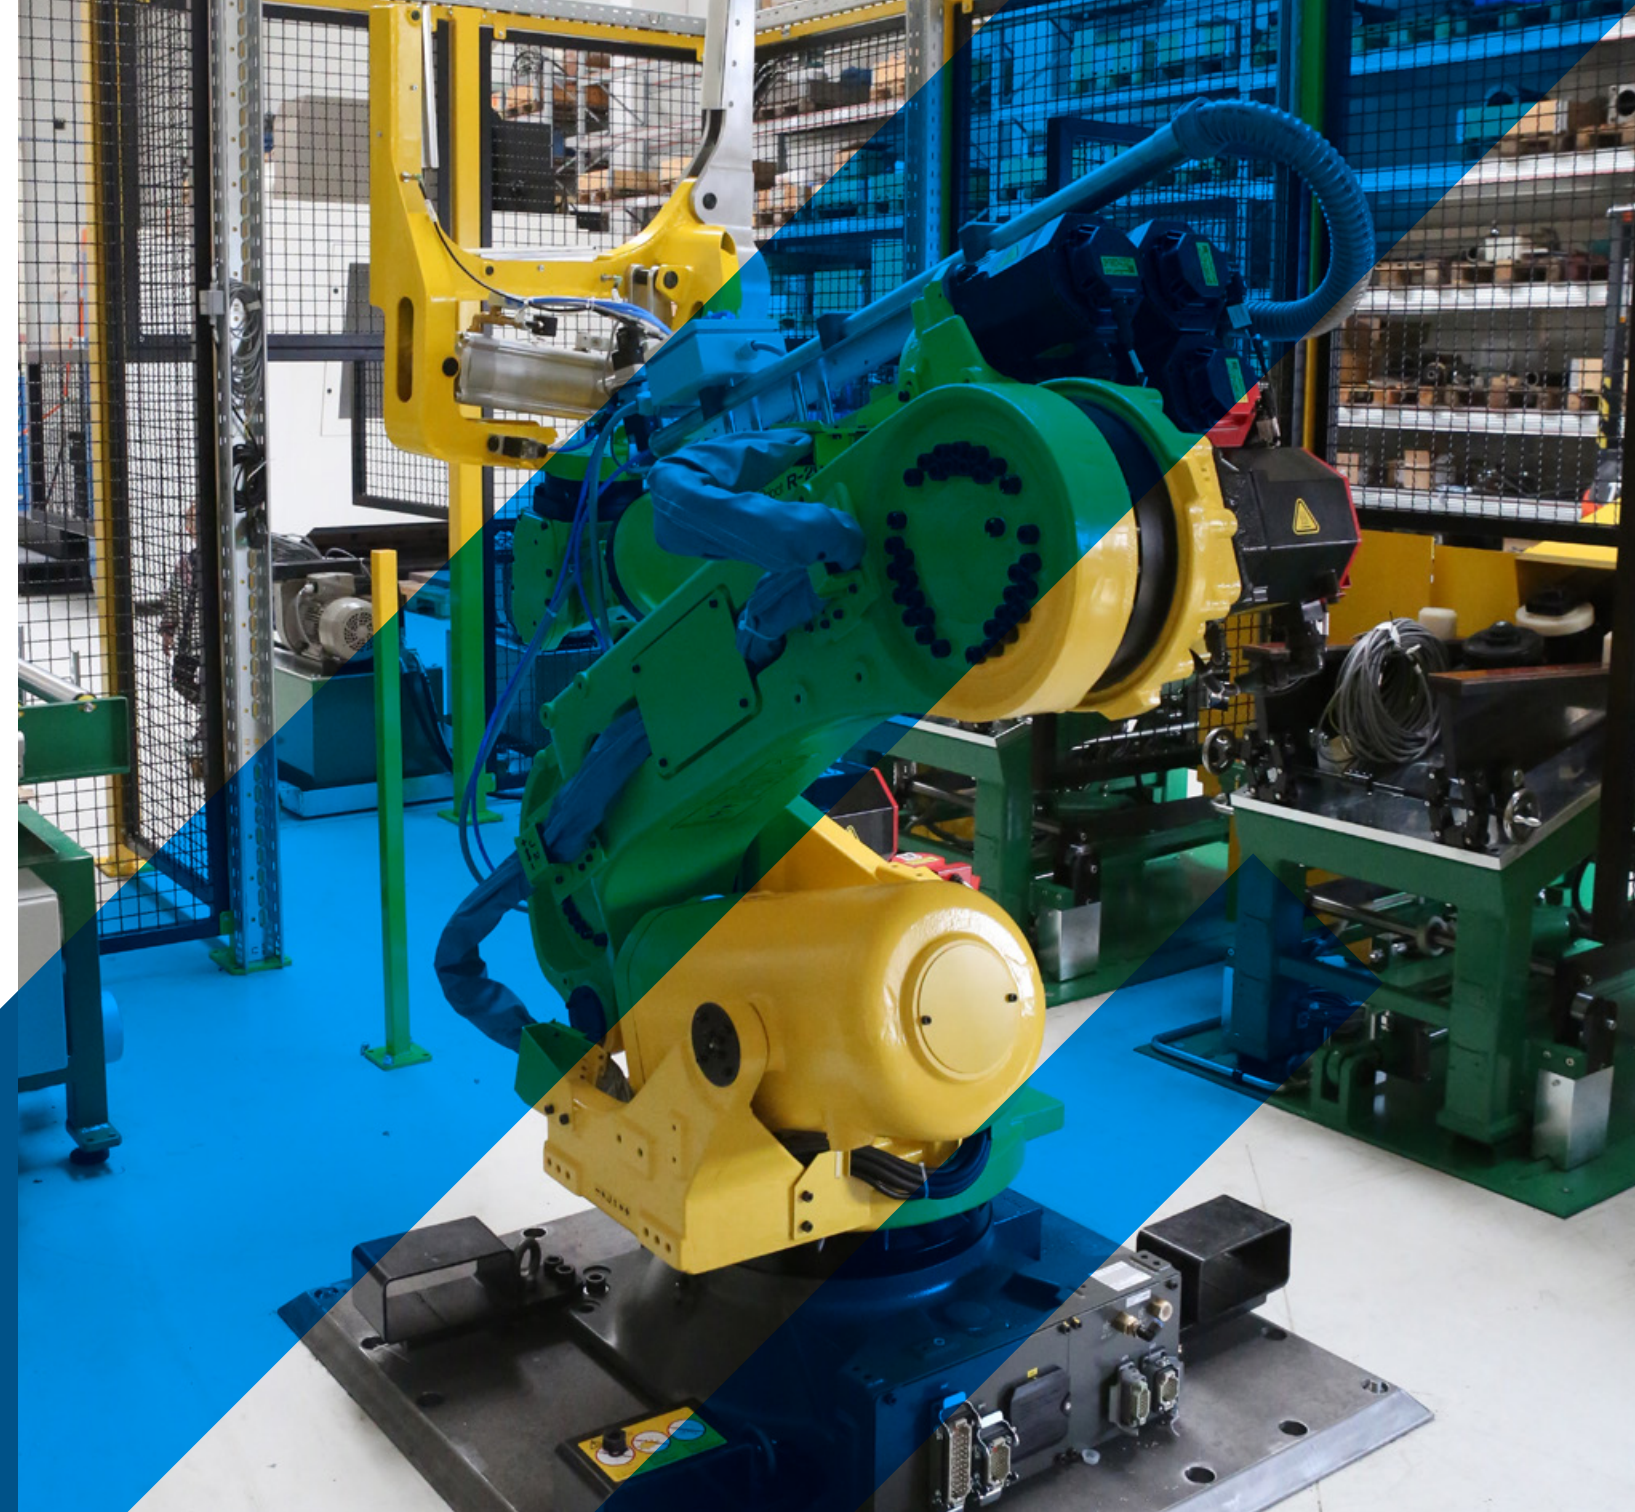

Automation offers all companies the opportunity to become more competitive, increasing production and turnover ratios.

The digitalized machines developed and manufactured by us offer the following advantages:

- savings in manpower
- higher productivity and machine availability
- increased manufacturing volume
- energy savings
- forward production planning
- more effective health and safety solutions
- greater workplace safety
- faster change between product types and workflows
- top quality technology data collection and production monitoring

The automation of work processes, meeting strict technical requirements, the creation of automated machines, meeting individual needs, requires careful planning and considerable experience, where technology, machinery, electronics and information technology form a harmonious unit.

With our experience in planning, building and refitting close to one hundred automated machines, the satisfaction of our existing and future clients is guaranteed.

## COMMERCE

Our sales activity is based on acquiring the highest quality materials and parts not only for the machines manufactured by us, but we also provide their availability for our partners. We supply the Hungarian representatives of numerous multinational hydraulic parts manufacturing companies, with many of our spare parts being in stock, available immediately. We supply our clients with parts and complete solutions alike. Our sales engineers think in systems and keep up with the latest technological developments. The key pillars of our customer-focused business policy are our wide product range, full service and compliance with individual needs.

We offer not only spare parts but also complete solutions.

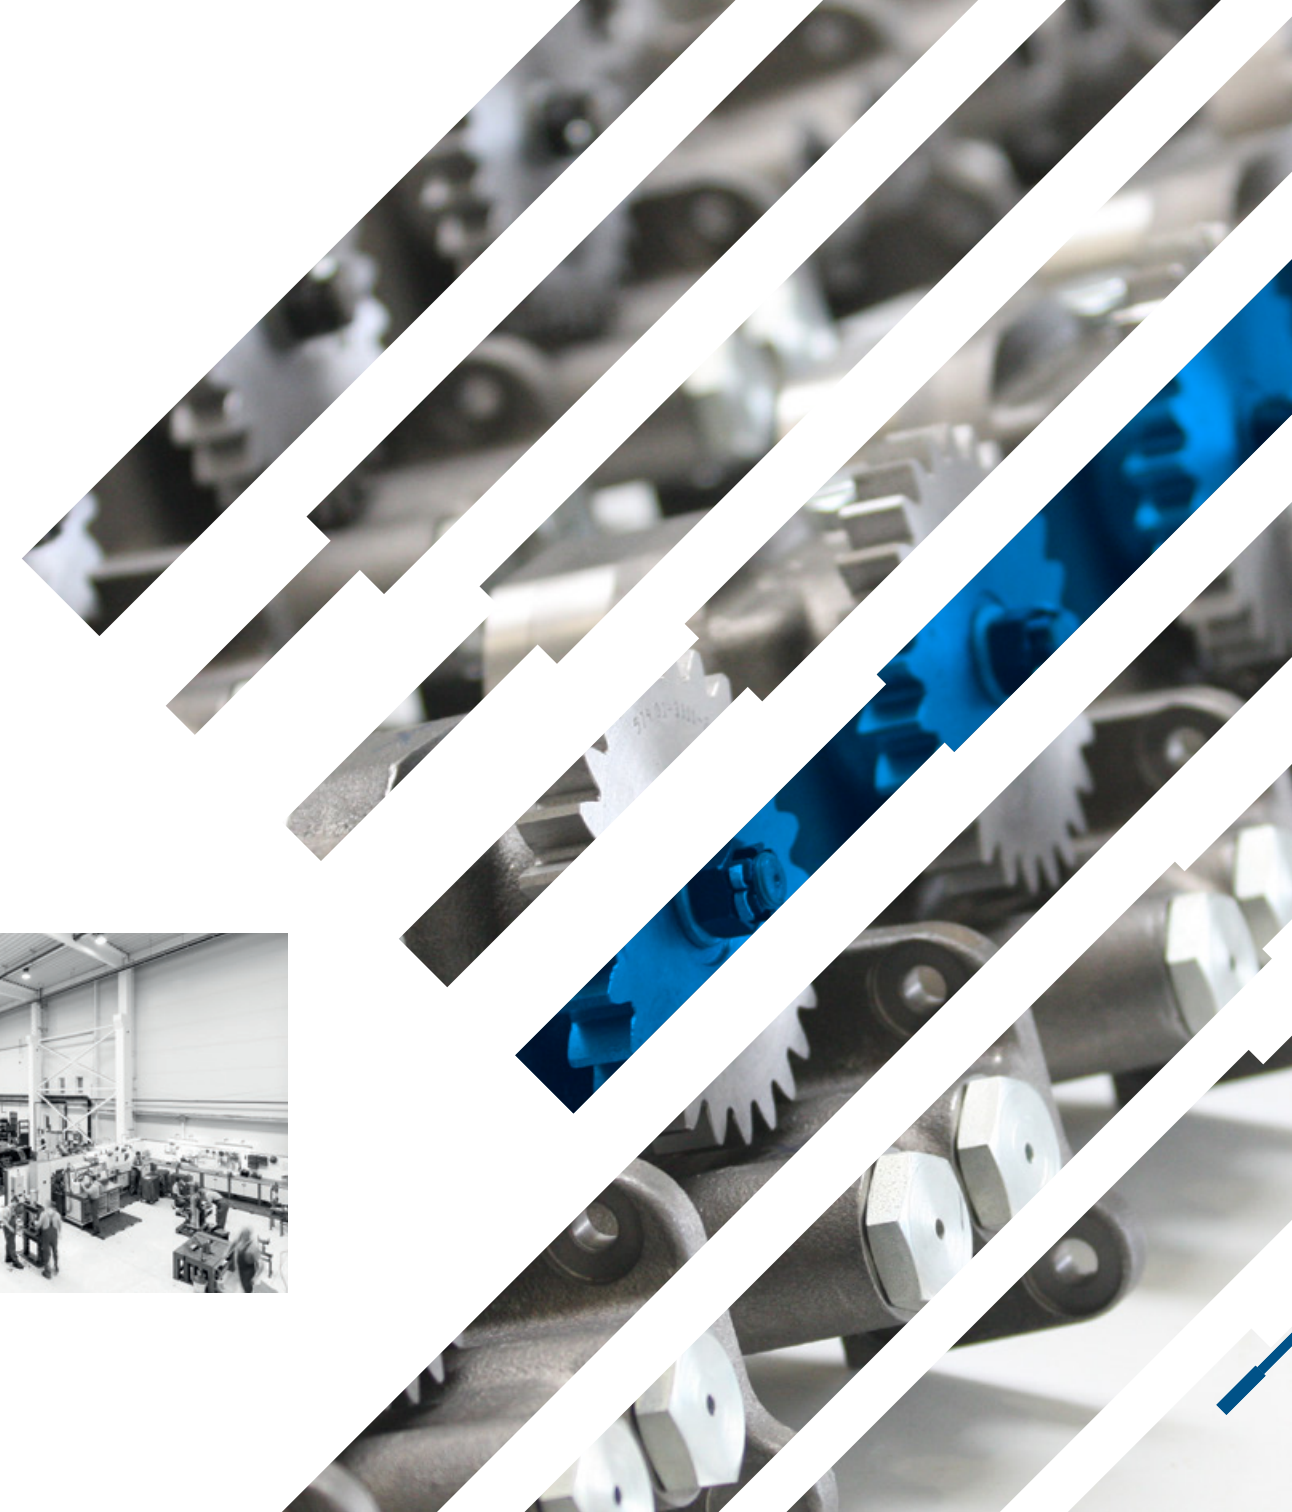

**RESEARCH DEVELOPMENT INNOVATION**

” Having the ability to do something really well creates a real sense of pleasure. ”

Working together with our partners we are continuously developing new and innovative solutions. We have developed specific machines for different branches of industry. Successfully solved tasks has brought an increasing orders, so today we are in contact with nearly 2000 partners, including both multinational and Hungarian companies, small and large alike. Cooperation with our partners is based on mutual trust. With 25 years of professional experience we offer individual, effective, complete solutions to virtually all branches of industry.

## OUR ENGINEERS

The enthusiasm of our excellent team of engineers, their creativity and endless search for innovative solutions ensures that our clients always receive the best customised solution for their individual needs. The work of our engineers is supported by the latest state-of-the-art technology, their professional development is maintained through continuous training and participation in international professional events. The close cooperation with educational institutes supports the education of future generations of engineers.
